DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-16, 23-46, 84-96, 104-106 drawn to device, classified in class 257, subclass 1+.
- II. Claims 47-83, 116-119, drawn to method of making, classified in class 438, subclass 48.
- III. Claims 17-22, 97-103, 107-115, drawn to method of using, classified in class 73, subclass 1+.

Inventions *electrostatic actuator for MEMS systems* and *methods of fabricating the same* are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case instead of forming the blades through etching deep trenches, such blades could be formed in a second substrate and attached to the first through some kind of bonding.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper. A telephone call was made to Lester J. Vincent on 3/12/02 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
